PROFILE

Software Engineer with over four years of experience in full-stack web and mobile development. I build APIs and user-focused products with .NET, C#, React, and Next.js, and create AI-assisted short-form video content that turns concepts into engaging social stories.

CORE STRENGTHS

- Develop secure APIs, database architectures, and authentication systems with security and compliance in mind.
- Translate UI/UX designs into responsive front-end experiences with React, Next.js, Vue, and React Native.
- Collaborate with product, design, and engineering teams to deliver scalable, high-performing solutions.

TECHNICAL TOOLKIT

FRONT END

React, Next.js, Vue.js, TypeScript, Tailwind CSS, HTML, CSS

DATA & APIS

PostgreSQL, MySQL, MongoDB, REST APIs, Stripe

SECURITY

JWT, IdentityServer4, OAuth, secure web practices

BACK END

.NET, ASP.NET Core, Node.js, Go

CLOUD & DELIVERY

Azure, AWS, Git, GitHub, Jira, Azure DevOps

OTHER

React Native, Kafka, Redis, SOLID, OOP

SELECTED WORK

NextSolution Template (2024) Full-stack starter integrating an ASP.NET API, Next.js web app, and Expo mobile app. [View project](#)

Academy Of Ours (2022) Interactive learning platform with courses, quizzes, and automated certificates. [View project](#)

Neimart (2019) E-commerce platform empowering vendors to manage their businesses. [View project](#)

Precious Assistant AI (2017) Voice- and text-controlled AI assistant for Windows. [View project](#)

AI video creation Create short-form social content with AI tools. [Watch on TikTok](#)

CERTIFICATIONS

- **Communication Strategies for a Virtual Age (2025)** [Certificate](#)
- **African Science and Technical Development (2019)** [Certificate](#)
- **Technology, Creativity & Skills Development (2019)** [Certificate](#)
- **SoloLearn C# Certificate (2017)** [Certificate](#)

EXPERIENCE

HUBTEL | SOFTWARE ENGINEER | OCT 2023 - PRESENT

Contribute to internal .NET back-office platforms that support operational teams through reliable APIs, background services, shared integrations, and user-facing tools.

- Deliver and maintain .NET APIs, background workers, scheduled processes, and internal web tools for operational workflows.
- Work with shared SDKs, service integrations, mocks, and automated tests to keep systems reliable and easier to evolve.
- Collaborate across product and operational teams to improve internal workflows while applying secure engineering practices.

EDUCATION

University of the People | Associate of Science in Computer Science [Certificate](#)

OpenLabs Ghana | Diploma in Software Development [Certificate](#)
